

Summary:

- These Teaching Materials are intended for Educational and Non-Commercial use
- They are primarily for Teachers, but may also be used by Students, individuals for self-study, and trainers for in-company (not for profit) training
- Use of the materials for paid-for courses requires prior permission
- Use of extracts is allowed if Imagination's copyright is acknowledged
- Publication in textbooks or use in paid-for training courses requires prior permission
- No warranty on the effectiveness of the materials is provided

Terms & Conditions:

To download these Teaching Materials, you first need to confirm you have read and agree to these conditions of use.

These teaching materials are intended for use in conjunction with Imagination's technology incorporated into development tools. These teaching materials ("Materials") may only be used for educational, non-commercial purposes. We are fine with you using them to help you use and learn about PowerVR, NNA, RISC-V and other Imagination technologies, to understand how they work and to develop your own solutions (whether in the classroom, at home as part of a course which you are studying, or in-house company training).

If you are a course leader, then provided you include an appropriate acknowledgment of Imagination's copyright in the Materials, then you are welcome to copy and paste sections from the Materials (such as for hand-outs, lecture notes or presentation slides). However, where we set the limit is the bulk copying of the Materials or the reproduction of the Materials (whether in whole or in part) for distribution beyond the academic or training setting under which these technologies are being taught or for the creation of derivative works not related to the teaching or study of Imagination's technologies. This also means that you are not permitted to republish the Materials (or any part of them) in a book, journal or other publication (whether for commercial reward or not), or using the Materials for the basis of providing paid-for training courses specifically related to these technologies. You will need our consent in order to do such things. If you wish to do this, please contact Imagination via the University "IUP" Forum and we will be happy to discuss this with you. In addition, the Materials should not be shared with anyone who will use the Materials to perform competitive analyses of Imagination's technologies against third-party technologies.

The Materials are all provided "as is" and free-of-charge, so please take them as you find them; we are unable to provide any warranties in respect of the Materials of any nature and we limit or disclaim any liability to maximum extent permitted by law. If you believe that any of the Materials contain any errors, please let us know. The copyrights and other intellectual property rights in the Materials all belong to Imagination (unless specifically stated otherwise) and, other than the limited rights that we have set out above, you are not granted any other rights to the Materials.

By choosing to download the Materials, you are confirming your agreement to comply with the conditions of use set out above (which are the 'entire agreement' in relation to your use of the Materials). If you don't agree to any of the above, then you may not use the Materials and you will need to stop at this point (or delete the Materials if you have already downloaded them). If there is any dispute that arises out of your use or misuse of the Materials, then English law will apply and all disputes will need to be resolved in the English courts.

If you have any queries in relation to these Materials, please get in touch via the Forum of the IUP website. <https://university.imgtec.com/forums/>
